# MALARIA

Once the "Angel" of New York's An Invisible Enemy to Health.

Malaria is an invisible atmospheric poison. The air becomes infected with the gases and microbes arising from the marshes and low lands, damp cellars, sewer pipes, badly ventilated houses and decaying vegetable matter, and we unconsciously inhale them into the lungs, when they are taken up by the blood and circulated throughout the system.

Malaria gives no warning of its coming; no immediate effects are seen, and no violent symptoms appear until the unfortunate sufferer is completely at the mercy of this hidden foe. This invisible enemy may be following us night and day, but often the first intimation we have of its presence is a chilly, creepy sensation running over the body, sometimes followed by a slight fever, and an always tired, drowsy and depressed feeling. The blood soon becomes deeply poisoned, thinned and weakened by the teeming millions of microbes and germs, and an irregular, slow circu-

lation is the result. This condition of the blood gives rise to innumerable and serious troubles: torpid liver, enlargement of the spleen, loss of appetite and feeble digestion, a pallid or yellow skin, boils, carbuncles, abscesses, indolent ulcers, and pustular and scabby skin eruptions of various

LOUISVILLE, Kv., March 26th, 1902. For several years I suffered with Chills and Fever, caused by Malaria in my system, and each summer for several years I would relapse. Finally my physician prescribed S. S. S. In all, I took three bottles, and they entirely cured me, and I have never been troubled since. I am sure no other medicine could have given me so complete and immediate relief, and I cannot speak too highly of S. S. S. My partner in business is now taking S. S. S. for an eruption of the skin and general run down condition of his system, and though he has taken but one bottle, already commences to feel better.

931 West Market St. I. SHAPOFF. kinds, are common symptoms of malaria. Frequently the health becomes so impaired, and

such a lifeless condition ensues that the person loses interest in his surroundings and faith in all human remedies. Malaria, if allowed to remain in the system, lays the foundation for other diseases that very often prove fatal or permanently wreck the health.

Malaria can only be worked out of the system

through the blood, and a remedy that can destroy the germs and microbes and neutralize the bad effects of the poison offers the only hope of a cure, and the only medicine that can accomplish this is S. S. S., which not only purges the blood of all morbid, unhealthy matter, but keeps it pure and

healthy. It searches out and destroys every trace of Malarial poison, and keeps the blood in such a vigorous condition that poisonous matters of no kind are allowed to accumulate, but are promptly expelled from the system. During the spring is an opportune time to begin the fight against this invisible enemy, for the hot, sultry summer days will cause the germs to multiply and still further impoverish the

blood and weaken the constitution, and now more than ever the Malaria sufferer needs a good

blood purifier and bracing tonic. A course of S. S. S. at this particular season will relieve you of Malaria and its attendant evils, reinforce and build up the system, purify and strengthen the sluggish blood and quicken the circulation, when the appetite and digestion improve and all the vital powers rapidly recuperate under the invigorating tonic influence of this great vegetable remedy.

Its freedom from all minerals makes it the ideal remedy in all Malarial troubles and perfectly adapted to the most delicate constitutions. If you have any symptoms of Malarial poison, write us fully about it, and our Physicians will take up your case and advise you without charge. Book on Blood and Skin Diseases, free.
